**VETERAN STUDENT SPOTLIGHT ON...**

**CATHERINE SHELTON**  
Air Force Veteran, Engineering Major

---

**Hello, Catherine! Tell us a little about yourself and your background...**

I’m majoring in mechanical or aerospace engineering (I haven’t decided yet) at MC, and I am an Air Force veteran. I was honorably discharged with E-4 rank, and I was an aircraft maintenance journeyman, a.k.a.: "Crew Chief". I’m 29; my hometown is Montgomery Village, although I moved here when I was 5 from Slidell, LA.

**Can you tell us more about your service?**

I was on Active Duty four years: November 2001-November 2005. (I was already in a delayed enlistment program before 9/11). My permanent base was at McGuire AFB, NJ, working on the KC-10A refueling aircraft. I was deployed to the theater three times, and traveled extensively throughout the US, Europe, the Pacific Islands, Japan, the Middle East, South America, and Greenland. I was an honor graduate out of Basic Training and Tech School, and received my rank of E-4 six months prior to my scheduled promotion date.

What I loved most was the travel, and the friendships I made. I have many memories I wouldn’t trade for anything...not even the "college experience" I might have missed out on. The hardest was being away from loved ones so much, and being in a disorganized unit with low morale. (I decided to get out because of poor administration within my unit, and to go back to school).

**What is the biggest challenge for you as a returning veteran?**

The learning style is very different from military training. Adjusting from "Failure is not an option--if this plane does not go up, other pilots will have to use their ejection seat" to "If you bomb a test that’s okay, I’ll drop the lowest test score at the end of the semester" can be a little tough.

On the flip side, college teaches you to think for yourself. That can be a little scary when you’ve been told what to do for several years. Scary but exciting.

**What are your plans after MC?**

I plan to transfer to a four year university (possibly University of Maryland, College Park) for a B.S. in engineering.

**What advice do you have for other veterans returning to college?**

Don’t be so hard on yourself if you’re finding going back to school is a hard adjustment. Your world view is extremely beneficial, and can only help you with the challenges that returning to school brings. The number of vets going back to school will only increase: try to find another vet who’s been in your shoes.

The Power of Love
By Ismail Meredith

The power of love is the all of me
The worst is living without.
The power of love humbles
harmony
The power of love hushes doubt.
The power of love is immortal,
Reflection of stars everlasting.
The power is love is a portal,
Through time all hearts we are
passing.
Fire has no burn to alter,
Water created your thirst.
For perfection we must learn to
falter,
Yet always rise back in love first.
The power of love is so even,
If alone itself does seem odd.
The power of love needs no
reason,
You can’t quit your only true job.
The power of love is a vision,
Of light that brings all to view.
This is my heart’s ammunition,
I’m aiming love’s power at you.

My name is Ismail Joseph Meredith
and I am the proud father of three
beautiful children: Iesha,
Melchizedek, and Nadira. They are
all the joy in my heart and the
source of my inspiration. My
favorite hobbies are writing poetry
and performing Christian rap. I am
also a 26-year old veteran of
Operation Iraqi Freedom. Even though I experienced many
hardships during my military service, I am endlessly grateful for the
opportunities and benefits of serving my country and would do it
again, gladly. Duty, honor, respect, integrity, inner strength and
selfless service are just a few of
the positive attributes our Army
will graph into the fiber of your
character. Today, an American
flag or the word patriot means
more than the letters can say or
the stars and stripes can depict
to me. I am studying here at MC
with the goal of becoming an
elementary or grade school
teacher I was told by a wise old man that life itself is and should
be an opportunity for learning. Learning is the first thing that all
of us do upon conception. If I can offer anyone advice, it would be
to never underestimate the power of your mind and the timeless
strength of ideas it can imagine
and bring into existence. It is my
advice to you to restlessly pursue
the fruition of whatever your
good dream is made of. You may
find help where you never
expected.
So with all I hope
my
work and presence here at
Montgomery College will inspire
to inspire and I wish you all well in the pursuit of happiness.

- Ismail
